Description

The 40 Series of burnishing, polishing and maintenance pads are designed for durability and longevity for a wide variety of applications. The flooring tools are diamond coated throughout the entire pad creating a stronger, wear and tear resistant pad at an economical price. The diamond powders provide extended life due to the ability to use either side creating a stronger, more durable tool for most flooring situations

Uses

These are primarily used as a burnishing pad for high speed burnishing machines to create the heat needed in the application of most guards or sealers specified in concrete polishing. The versatility and diamond coating in the pad also make it the ideal tool for cleaning and/or maintaining floors of most types including CVT, natural stone and concrete. When used in a regular maintenance program the **Hurricane Pad** is extraordinary. The pads may be used **wet** or **dry** and is available in various sizes to meet most maintenance machines including swing type and automatic floor scrubbing machines. The materials hold up well to harsh chemicals including mild acids used to etch floors. The variety of grits available makes it an ideal pad for scrubbing and buffing all types of flooring.

Application

The 40 Series Hurricane Pad is ideal for burnishing, cleaning, refurbishing, buffing, and maintaining concrete and terrazzo as well as restoration and maintenance on natural stone floors of all types. The 5" is used by many countertop fabricators to clean, buff and finish many varieties of countertops.
